SOUTHWEST HEALTHCARE SERVICES

Southwest Healthcare Service's Visiting Nurse Services, often referred to as Home Care, provides comprehensive in-home care and supportive services for elderly, disabled, acute illness, long-term illness or terminally ill patients.

Skilled home care provides clinical intervention such as wound care, assistance with medication, post surgical care, pain management, vitals, complicated medical issues, or teaching individuals and their families self-management of their health care needs.

Home care services can also be non-skilled. This includes help with daily living activities such as bathing, dressing, assistance with exercise and other home care services that promote independence or enrich the quality of life.
